SUMMARY

Full-stack software developer building and deploying end-to-end web applications with React, Node.js, Express.js, and REST APIs, backed by MongoDB and MySQL. Strong in modern JavaScript (ES6+), authentication with protected routes (Firebase Auth), and performance optimization — code splitting, memoization, and caching. Practicing Data Structures & Algorithms in C++; seeking an SDE internship / entry-level role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, C++, C, SQL

Frontend: React, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend & APIs: Node.js, Express.js, REST APIs, JSON, Firebase Authentication, OAuth 2.0

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Chrome & React DevTools, Firebase, Cloudflare Pages, Vercel

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

YouTube Clone — Video Streaming Platform

[Jun 2026]

React · Redux Toolkit · Tailwind CSS · YouTube Data API v3 | [GitHub](#) · [Live Demo](#)

- Built a video streaming platform on the **YouTube Data API v3** with debounced search (~200 ms) and session-level result **caching** to cut redundant API calls; implemented infinite scrolling and category-based browsing.
- Designed a **recursive nested-comments** component supporting n-level replies and a **live-chat** feed using API polling with a fixed-size message buffer, keeping DOM size and memory flat under continuous updates.

NetflixGPT — AI Movie Recommendation Platform

[Jun 2026]

React · Redux Toolkit · OpenAI GPT-3.5 API · Firebase | [GitHub](#) · [Live Demo](#)

- Engineered an AI recommendation flow that calls the **OpenAI GPT-3.5 API** and maps model output to **TMDB** search queries, rendering real movie results from live data.
- Implemented **Firebase Authentication** with protected routes and client-side form validation; added config-driven **multilingual UI** support.
- Optimized performance via **memoization** (useMemo/useCallback), **lazy loading** with React.lazy + Suspense, and reusable **custom hooks**; deployed on Firebase Hosting.

Food Ordering Platform — React SPA

[May 2026]

React · Redux Toolkit · React Router | [GitHub](#) · [Live Demo](#)

- Developed a food-ordering single-page application with **20+ reusable components**, client-side routing via **React Router**, and centralized cart state with **Redux Toolkit**.
- Integrated live restaurant **REST APIs** through custom hooks, with shimmer loading states and graceful error/empty-state handling; deployed on **Cloudflare Pages**.

EDUCATION

Bachelor of Engineering (B.E.), Computer Engineering

Expected May 2027

Bharat College of Engineering, Badlapur — University of Mumbai · CGPA: [6.29 / 10]

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

CODING PROFILES & TRAINING

Profiles: [LeetCode](#) · [GeeksforGeeks](#) · [HackerRank](#)

Training: Namaste JavaScript & Namaste React — NamasteDev.com (Akshay Saini), 2026 · Java Programming — Amar Singh, 2025
